RE: Formal Transfer of Operations, Chevron Chemical Company to SF Phosphates Ltd. Vernal Phosphate Mine, M/047/007, Uintah County, Utah

Jim, we have just received an original signature page from Chevron Chemical for the enclosed transfer form. The long and frustrating journey to this point has included changes in company names, changes in company representatives, transfer forms which were lost, released bonds which could not be found, and signature pages which never arrived. The surety posted by SF Phosphates was accepted by the Board in April 1994. The Chevron bond was released shortly after that.

Please note that the transferor signature page 3/6 has been retyped by Chevron, although the language is exactly the same as our version (blank copy of page 3 included). Also note the two signature pages were signed two years apart. If this collection of transfer form pieces is acceptable, please sign page five of the form and return it to me. Copies of the complete document will be sent out to both parties.

THANKS!

JOELLE,  
MAKE COPIES!  
DRAFT A <sup>COVER</sup> LETTER!  
YAHOOO!  
LET'S FINISH THIS UP.

Tony (THANKS)
